Infla-Sealing S.r.l.s. is an Italian company, which was born to produce, market and expand the product of *TEKVA* "Sealing" division, a company that has been operating for years especially in the piping sector.

Infla-Sealing S.r.l.s. is mainly focused on the production and distribution of inflatable seals and *Inerting Fast* powders.

It addresses to mechanical, chemical, food, pharmaceutical, oil and precision industries, power plants, oil platforms and refineries.

Infla-Sealing S.r.l.s. offers its customers, customized inflatable seals for applications suitable for the required design and use needs. The gaskets produced by **Infla-Sealing S.r.l.s.** are individually tested in the laboratory before being sold, this allows the company to be able to provide a highly reliable, performing and resistant products.

Infla-Sealing S.r.l.s. is equally attentive to environmental issues, offering the "*Inerting Fast*" product, an inertising powder for acids and mineral oils, certified by the Chemistry Department of the University of Pisa, in full compliance with the Ministerial Decree Environment 24 January 2011 n ° 20. *Inerting Fast* is used in all situations where there are areas with the presence of battery acids, such as recharging units or polluting products, or mineral oils where a high absorption rate is required.

Infla-Sealing S.r.l.s. offers a complete and organized service, which includes: the analysis of the technical characteristics of the application, the choice of suitable profiles, assistance during the test phase, all aimed at satisfying the customer's needs. **Infla-Sealing S.r.l.s.**, taking advantage of Tekva's experience, can devote itself to research, innovation and to the constant challenge of honing its efficiency, with a view to improve environment.
